

IIT Madras

# Advanced Certification in Software Engineering for Cloud, Blockchain & IoT

LEARNER TESTIMONIALS

# Learner Testimonials

“

The course has been informative so far especially the material shared as part of the course and subsequent exchange of information between the cohorts and mentors. The assessments are fair and provides value towards the learning achieved. Eagerly waiting for courses on IOT and blockchain to learn more.

**Ramanathan Narayanan**  
Director, Vancity

“

I would say it's a architect's delight. I'm learning so much out of it. I come from an application support background to an architect's role.. so not so strong in basics of architecture this course is helping me a lot. Perfect course for me!!

**Nagaraj Ulgaraj**  
Solutions Architect, ITC Infotech

“

The program is well thought of and organized. The content quality, delivery methodology and practical orientation is highly appreciated with industry examples and case studies. The projects provide a platform to test and implement our learnings. Overall an excellent and recommended program

**Raghu Arrebelly**  
Architect, Oracle

“

So far the course is very interesting with a lot of topics to learn. Also, the practical session during weekend is quite useful, the mentors are having real world experience in using the technology they talk about, it's a good learning experience to get an insight from those experts.

The course is demanding but also challenging

**Sridharan**  
CEO/Technical director, Ramarson

# Learner Testimonials

“

I have been dreaming of developing a Program Engine specific to industry and all my past dreams are matching with the course. Foresee the course has already been built to achieve. Thanks to all the efforts from IIT Madras and Great Learning.

**Nagaraj M Chanakya**  
IT Consultant, IBM

“

I am extremely satisfied. The course is very well structured and modular which has helped me, both in refreshing my programming skills and to upskill myself with the current technologies. Weekly mentoring sessions helped me to get insights of practical knowledge from industry experts and gain hands-on experience which enhanced my learning.

**Suganthi Durai**  
Senior Software Specialist, IBM

“

This is the future of the technology stack. Its really been a wonderful experience to get the mentored sessions by IIT Madras faculty. They emphasize on the practical use cases and real life implementations of the latest technology concepts. I am very happy I enrolled for this course and found the course structure and the teaching methodology very good.

**Hardik Jani**  
Technical Architect, Performix

“

The course is robustly designed to keep me competitive. I find myself excel professionally amongst my colleagues. The terminologies of the trade and understanding on the architecture bigger picture enabled me to ask relevant questions in my official meetings. I have started already recommending this course to all my friends and colleagues.

**Vivek Sagar**  
Test Lead, Tech Mahindra
